

**Jessica Barth, PhD, MS**  
Advanced Health Fellow, THRIVE COIN  
Research Associate in Medicine  
[Jessica.Barth2@va.gov](mailto:Jessica.Barth2@va.gov)

**Ask me about:** Post-acute rehabilitation services, upper limb movement and use, measuring outcomes with wearable sensors

Dr. Barth is an occupational therapist (OT) by clinical background. She completed her PhD in Movement Science at Washington University in St. Louis where she also received a MS in Clinical Investigation and a Certificate in Dissemination and Implementation Sciences. She has expertise in neurorehabilitation research for medically complex populations and using wearable sensors to measure rehabilitation outcomes of adults in their free-living environment. As an Advanced Health Fellow in RI, she applies the theoretical perspective and research skills she has developed to explore

implementation science questions that are most relevant to vulnerable Veteran populations and their service providers, including investigating Veteran access to and utilization of post-acute rehabilitation services.

## THRIVE Goals

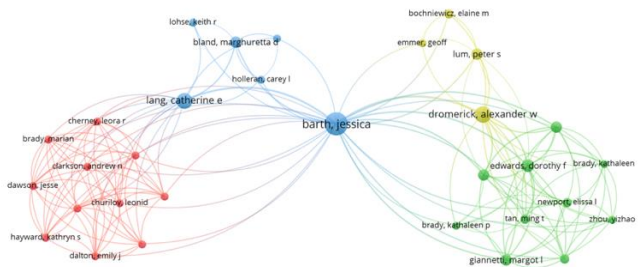

Impact Goal 1: LTSS Quality, Safety, Value
