Ask me about: Models of Dementia Care Routinely
Collected Health Data, Clinical Reasoning

Dr. Bayer is a physician specializing in internal medicine and geriatric medicine who practices in hospital and assisted living environments and implements innovative models of dementia care. He completed a fellowship in health services research at THRIVE COIN and has researched hospital discharge outcomes of persons living with dementia, impact of COVID-19 on VA Community Living Centers, Transitional Care Management in persons living with dementia, and mobile application-based cognitive testing in older adults.

THRIVE Goals

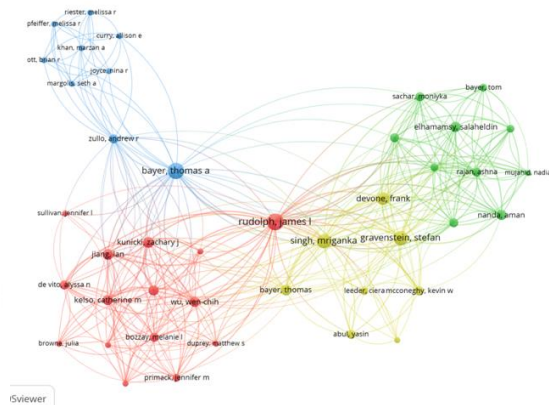

- Research complex transitions of care in VA
- Research care experiences of persons living with dementia in VA
- Adapt successful VA care programs to the needs of persons living with dementia

Research

Dementia Care	Post-Acute Care
Nursing Home Discharge	Care Coordination
Care Management
