ODATABASE & METHODS CYBERSEMINAR SERIES

Session 11:

Applications for Joint Longitudinal Viewer (JLV) in Research: Introduction

July 10, 2023

Amber Lane

Research Health Science Specialist, VA Eastern Colorado Healthcare System

Reese Omizo, MD

Clinical Informaticist & Primary Care Physician, VA Pacific Islands Healthcare System

DATABASE & METHODS CYBERSEMINAR SERIES

Informational seminars to help VA researchers access and use VA databases.

Sessions cover...

- VA data sources & data access systems
- Application of VA data to research and quality improvement questions
- Limitations of secondary data use
- Resources to support VA data use

First Monday of the month | 1:00pm-2:00pm ET

Date	Topic
7/24/23	Applications for Joint Longitudinal Viewer (JLV) in Research:
	Day to Day Uses

Visit the VIReC

ODATABASE & METHODS CYBERSEMINAR SERIES

Session 11:

Applications for Joint Longitudinal Viewer (JLV) in Research: Introduction

July 10, 2023

Amber Lane

Research Health Science Specialist, VA Eastern Colorado Healthcare System

Reese Omizo, MD

& Clinical Informaticist & Primary Care Physician, VA Pacific Islands Healthcare System

Poll #1:

What is your primary **role** in projects using VA data?

- Investigator, PI, Co-I
- Statistician, methodologist, biostatistician
- Data manager, analyst, or programmer
- Project coordinator
- Other please describe via the chat function

Poll #2:

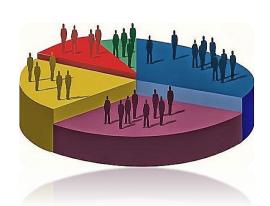

How many years of experience working with VA data?

- None I'm brand new to this!
- One year or less
- More than 1, less than 3 years
- At least 3, less than 7 years
- At least 7, less than 10 years
- 10 years or more

Poll #3:

How long have been using JLV?

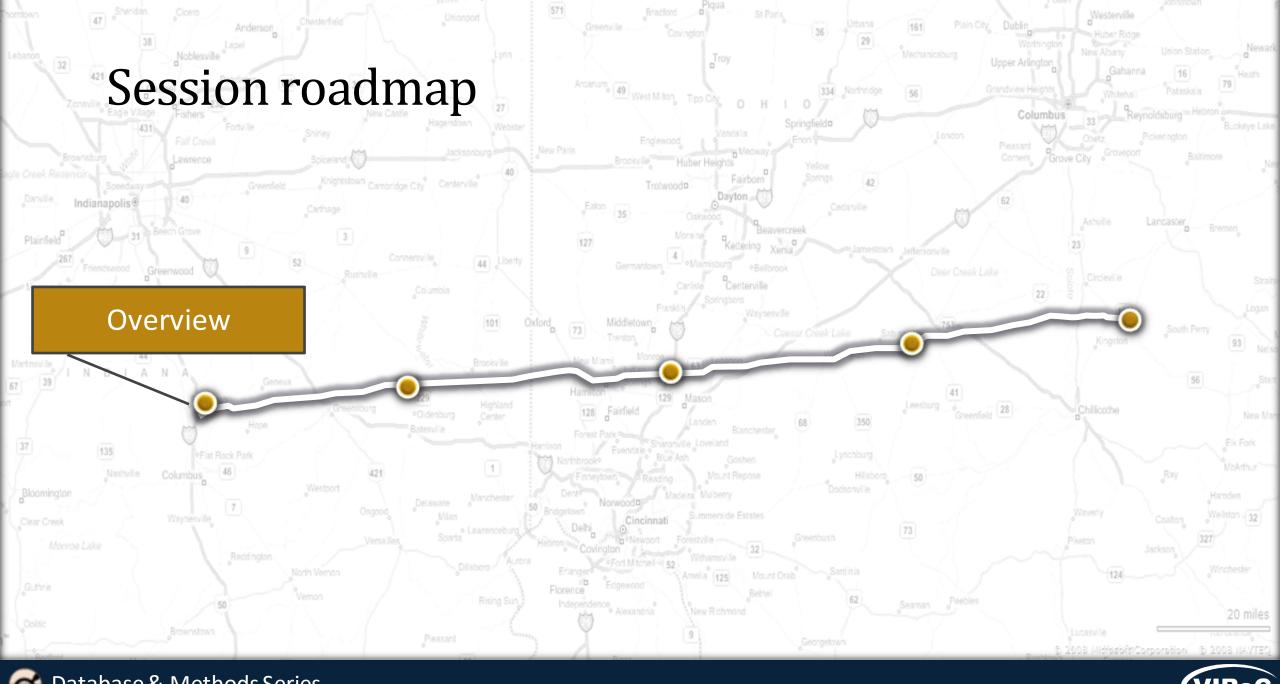

- None I'm brand new to this!
- One year or less
- More than 1, less than 3 years
- At least 3, less than 7 years
- At least 7, less than 10 years
- 10 years or more

Joint Longitudinal Viewer (JLV): What is it?

JLV provides a web-based integrated read-only view of health records from Department of Defense (DoD), VA and Community Partner sources

- Comprehensive, longitudinal record from all sources, sites and systems where a patient has received care
- Co-developed by VA and the DoD
- System of Systems Dependent upon other systems and services in the interoperability ecosystem

JLV Features

- Customizable by each user Enables viewing of multiple data types at once, creating and saving of custom views, and sorting and filtering supports efficiency at individual workflow level
- National level patient search for all users not limited to viewing only locally registered patients
- Certain data mapped to national standards supporting semantic interoperability

Information from <u>JLV Resources</u> training PowerPoint "JLV Office Hours 2023 May 23

Acronym list for next slide

- VistA- Veterans Health Information Systems and Technology Architecture
- CPRS- Computerized Patient Record System
- FEHR- Federal Electronic Health Record
- **FHIR-** Fast Healthcare Interoperability Resources
- API- Application Programming Interface
- MHS- Military Health System
- EHRM- Electronic Health Record Modernization
- CAMM- CareAware® MultiMedia

- AHLTA- Armed Forces Health Longitudinal Technology Application
- **CHCS-** Composite Health Care System
- HAIMS- Healthcare Artifact & Image
 Management System
- TMDS- Theater Medical Data Store
- FHIE- Federal Health Information Exchange
- ACS DAL- Agile Core Services Data Access Layer
- ILER- Individual Longitudinal Exposure Record
- ECIA- Enterprise Central Image Archive

JLV integrates records from many systems on a single screen*

- VistA /CPRS
- VistA Imaging
- MUSE™ Cardiology Studies

Cerner Millennium (FEHR)

- Cerner FHIR APIs
 - MHS GENESIS
 - VA EHRM
- Cerner CAMM Imaging

Private Sector Joint Health Information Exchange (JHIE)

- 271 partners <u>Click here for list</u> (>40,000 hospitals, clinics, etc.)
- 34,000+ CommonWell provider sites

Department of Defense

- AHLTA/CHCS
- Essentris®
- HAIMS
- TMDS
- Deployment Forms systems (FHIE, ACS DAL)
- ILER
- ECIA

- 34,000+ CommonWell provider sites

Department of Defense

- AHLTA/CHCS
- Essentris®
- HAIMS
- TMDS
- Deployment Forms systems (FHIE, ACS DAL)
- ILER
- ECIA

FAQ: How are CAPRI and CPRS different from JLV?

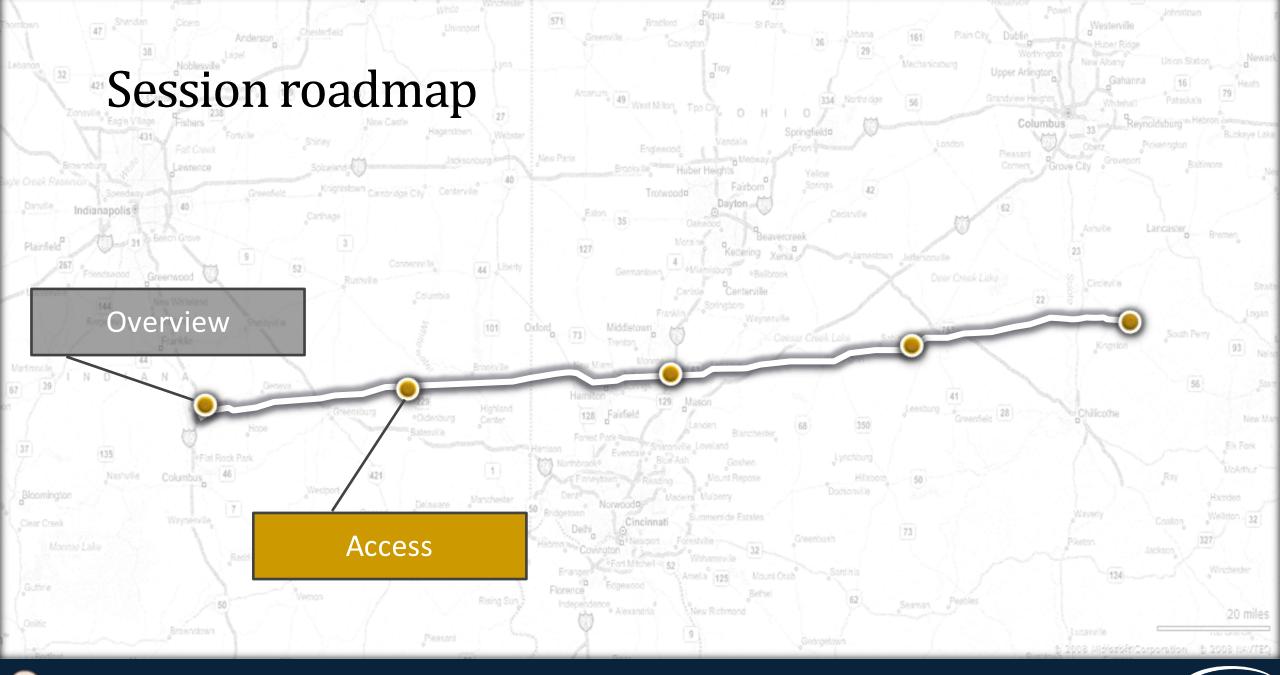

- CAPRI (Compensation and Pension Record Interchange) is read-only access to the VistA EHR (Electronic Health Record), with more functionality than JLV for looking at benefits that Veterans applied for/received
- CPRS is the standard EHR which is in the process of being replaced by Millennium
 - Has write capabilities

FAQ: Can JLV be used to generate data for multiple patients at one time?

- No. JLV gathers data from all connected systems for a <u>single</u> patient
- JLV cannot gather the same data element from multiple patients at one time
- JLV does not generate patient lists
 - Generating patient lists requires aggregation of full databases in a data warehouse like CDW (Corporate Data Warehouse)
- For more information about CDW, please visit: <u>https://vaww.virec.research.va.gov/CDW/Ove</u> rview.htm

Gaining Access to JLV

- Type of use = Type of access needed
 - Three types of use:
 - Operation/Non-research
 - Preparatory to Research
 - Research
- Detailed instructions for JLV access:

https://vaww.vhadataporta l.med.va.gov/ToolsApplicati ons/JLV.aspx#transition

Accessing JLV

Current CPRS and CAPRI Users

JLV is accessed by using either CPRS or CAPRI access and verify codes.

CPRS users automatically have access to JLV and can begin using it at any time for operations. However, you must be authorized in DART to use it for research.

VistAWeb users who do not have access to CAPRI or CPRS will need to request CAPRI access to use JLV. Visit the CAPRI page for more information.

All others will need to request access to JLV by following the steps below.

To verify whether you have access to JLV, follow the steps in the JLV Login Instructions and Login Help or email JLVTeam@va.gov for assistance.

Requesting Access to JLV

The process for requesting access to JLV depends on the purpose of your project, also known as the data access category. Select a category below for information on requesting access. If you're not sure which option to choose, visit the Data Access Overview page for additional guidance.

- ⊕ Operations/ Non-Research
- + Preparatory to Research
- + Research

Data Access Request Tracker (DART)

- For Research, a separate request for JLV is needed for each research project
 - Submit request(s) via the <u>Data</u>
 Access Request Tracker (DART)
- Important note: Waiver of HIPAA Authorization application and/or study protocol must contain a description of what data will be accessed and where it will be stored

Department of Veterans Affairs	RESEARCH ACCESS TO VHA ELECTRONIC HEALTH RECORDS

Logging in

- JLV can be launched multiple ways
 - JLV button in CPRS
 - JLV tab in CAPRI
 - JLV menu page in Cerner PowerChart
 - Google Chrome or Edge browsers
 - Internet Explorer does not work with JLV
 - https://jlv.med.va.gov/JLV/
- Login using PIV card
 - If PIV card does not work
 - CPRS/CAPRI Access/Verify or
 - Use the "View Other Sign-In Options' link to use Windows Authentication (Network Access/Verify)

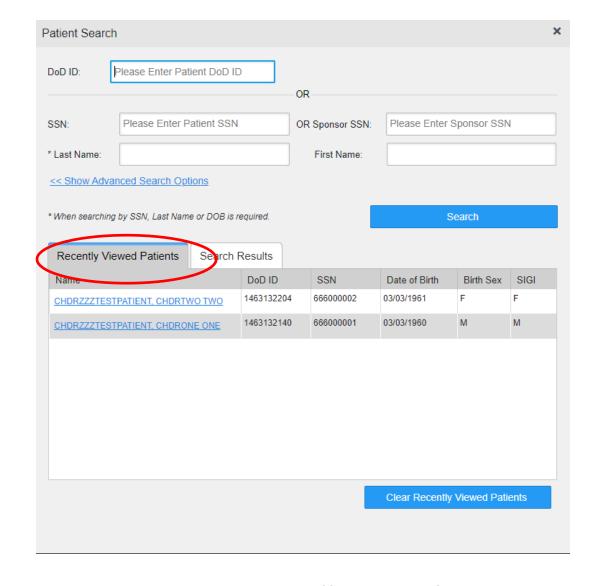

Patient search tool

 Recently viewed patients are retained across sessions

If you have a record open in CPRS or CAPRI, JLV will sense that a patient has already been selected and will automatically sync to that patient record.

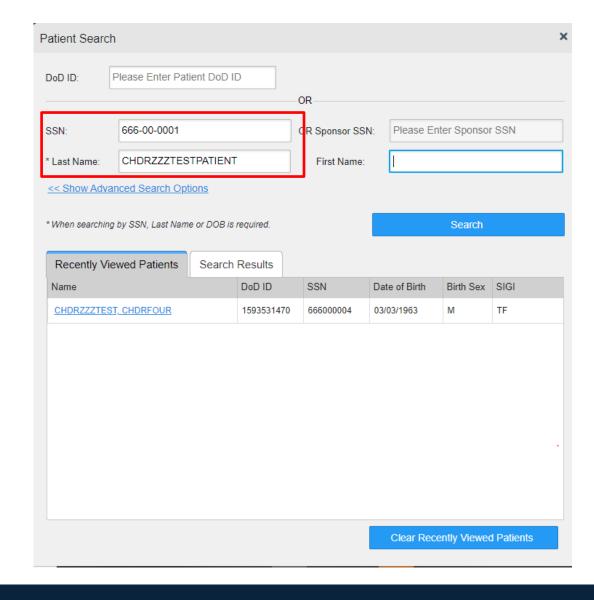

Finding patient records- Full SSN and full last name

- Most commonly used
- Common last names (i.e., Smith),
 will need full first name as well

Example Patient:

Last Name: CHDRZZZTESTPATIENT SSN: 666000001

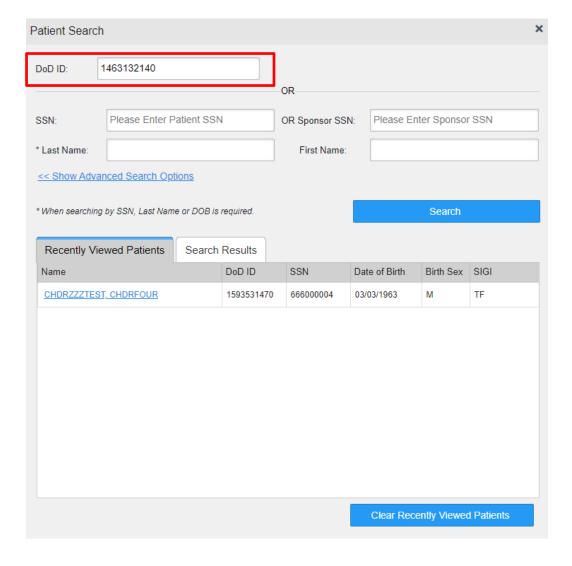

DoD ID number

- Easiest way to search
- DoD ID numbers can be pulled from DAVINCI data
 - Called DaVINCI Person Identifier or EDIPI

Example Patient:

DoD ID #: 1463132140

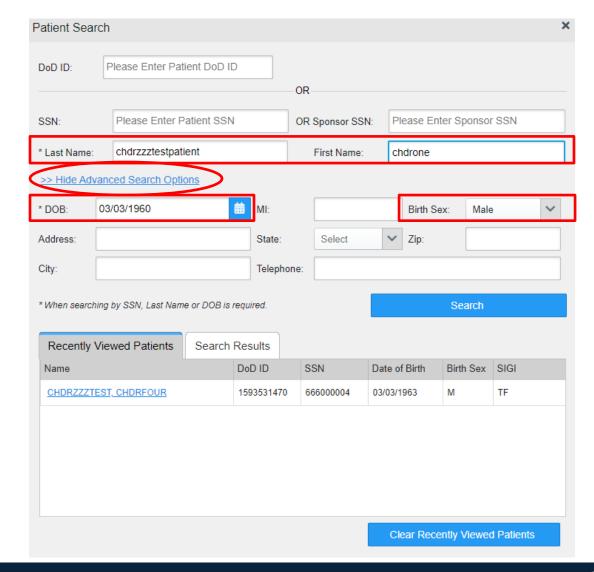

No SSN or DoD ID number

- Will need to use Advanced Search Options:
 - Full last and first name
 - Date of birth
 - Birth sex

Example Patient:

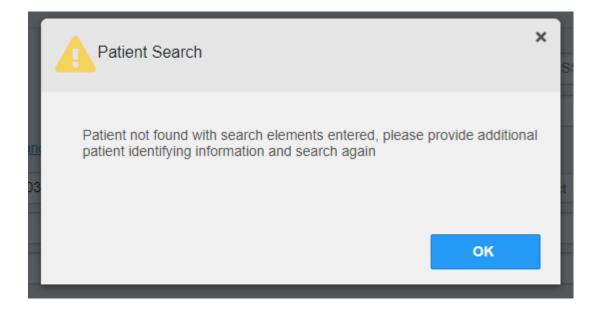

First Name: CHDRONE
Last Name: CHDRZZZTESTPATIENT
DOB: 03/03/1960
Birth Sex: M

Error message

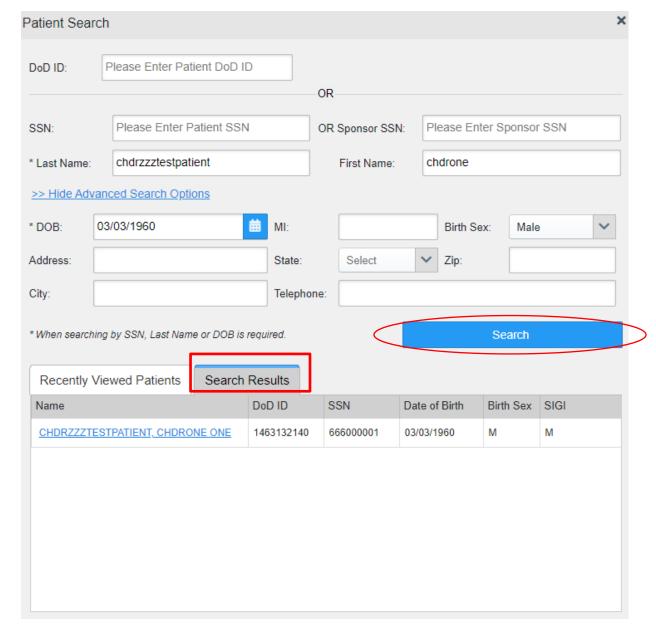

- Common message received because of:
 - Misspelling or mistyping information
 - Not having enough information
 - Searching for a common name

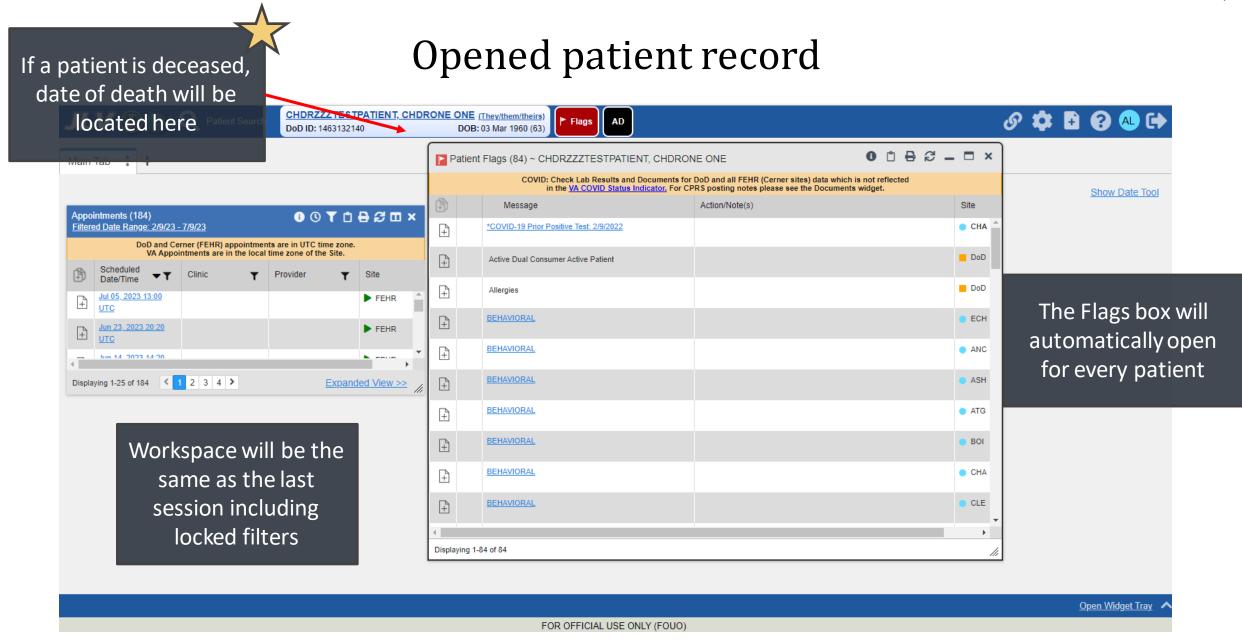

Results

 A record match will populate in "Search Results" tab

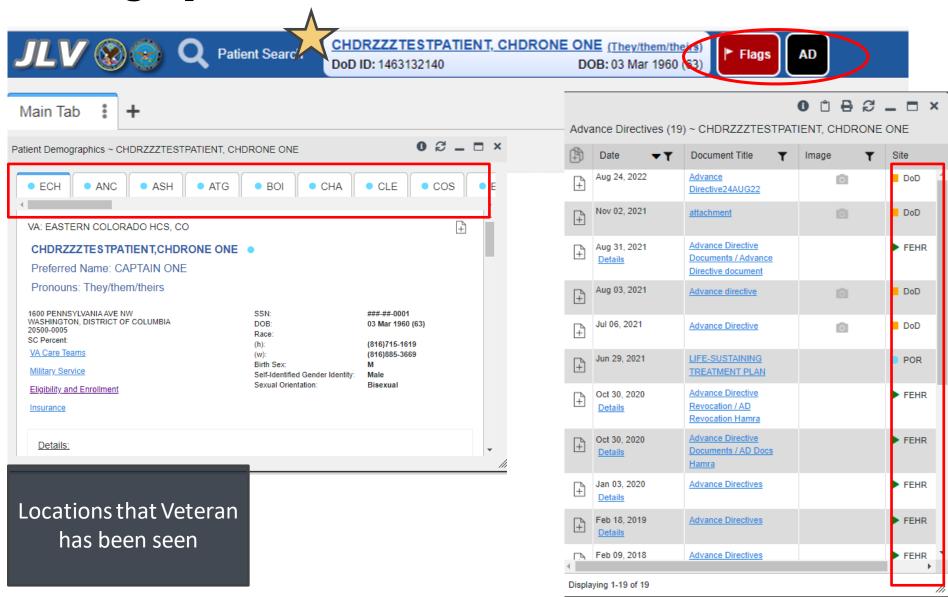

Demographics and AD

Select to reopen Flags or to open Advance Care Planning documents

Contains documents from all locations completed

Widgets- elements within JLV portals that contain and display data specific to a clinical domain

Admissions	Allergies	Appointments	Cardiology Studies - FEHR and VA MUSE Only	Clinical Reminders - VistA Only		
Community Health Summaries and Documents	Consults	Discharge / Inpatient Summaries	Documents & Images	Encounters - Outpatient		
Federal EHR/MHS GENESIS	Health Summaries and Reports - VistA Only	Imaging	Immunizations	Lab Results		
Medications - Inpatient	Medications - Outpatient	Orders	Problem List	Procedures		
Progress Notes	Questionnaires, Deployment, Exposure Records	Radiology Reports	Social, Family, and Other Histories	Surgery / Procedure Reports		
Vitals	Descriptions of widgets can be found in widget bar in JLV					

Patient Data and Widgets

Click here to see this page in full context

Patient Data and Widgets

Patient Data and Widgets are displayed along with the selected patient's clinical records and other patient-centric information. Data displayed within widgets is sometimes normalized to one or more industry standard.

New JLV users see a preconfigured default widget layout when a patient is selected. The default layout includes the Allergies, Problem List, Documents & Images, Medications - Outpatient, and Lab Results widgets, as well as the Patient Flags and Postings window if applicable.

This also includes a Commonly Used Widgets tab that displays the Appointments, Consults, Radiology Reports, Vitals, Immunizations, and Lab Results widgets. Any changes made to add or remove widgets from the portal display persist to the next he widget tray bar session.

> You can configure the layout of widgets and create multiple widget tabs. Customizations are saved to your user profile and remain until you change them manually. You can customize any of the following widgets:

> > Lab Results

Immunizations

- Demographics
- Admissions
- Allergies
- Cardiology Studies FEHR and VA MUSE Only
- Clinical Reminders VistA Only
- Community Health Summaries and Documents for VA Users
- Consults
- Discharge/Inpatient Summaries
- Documents & Images
- Encounters Outpatient
- Federal EHR/MHS GENESIS
- Health Summaries and Reports VistA Only
- Imaging

Drag and Drop Widgets to Your Portal Click here to view widget descriptions

n the tray to the de

Consults Reminders VistA Only

Open the widget tray (bottom right corner)

then drag/drop the blue widget box that

you want to view into one of the three

columns

Close Widget Tray

Other notes about widgets

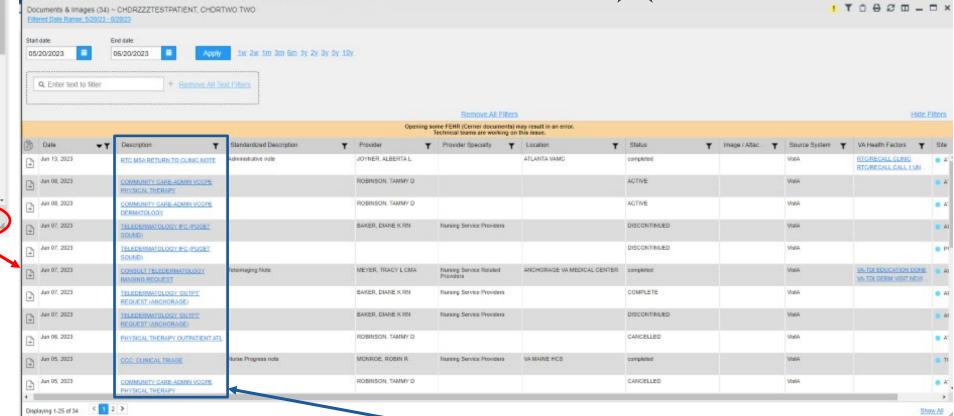

- Source systems define where data will be displayed
- Widgets are a snapshot in time
- Data may be duplicated or cross-referenced
 - Example: Clinical Notes could be in "Progress Notes", "Documents and Images" and hyperlinked in "Encounters- Outpatient"
- Scanned documents could be in the "Documents and Images" widget
 - Documents could be from either VistA Imaging (VA) or HAIMS (DoD)
- Community data may be scanned in the "Documents and Images" widget, or may be available in "Community Health Summaries and Documents" widget
- Cerner data is listed in widgets under the location "FEHR" or in the "Federal EHR/MHS Genesis" widget

A ® TOBSEX ocuments & Images (34) Opening some FEHR (Cerner documents) may result in an error Technical teams are working on this issue. T Provider 4 ROBINSON, TAMMY D. Expanded view and Widget Properties

Alerts you to Clinical Reminders
Clicking symbol will open the Clinical Reminder widget

Expanded view has more categories to filter

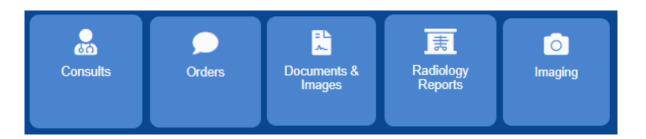

Best practice to work in expanded view when available

Clicking blue hyperlink will take you to note text

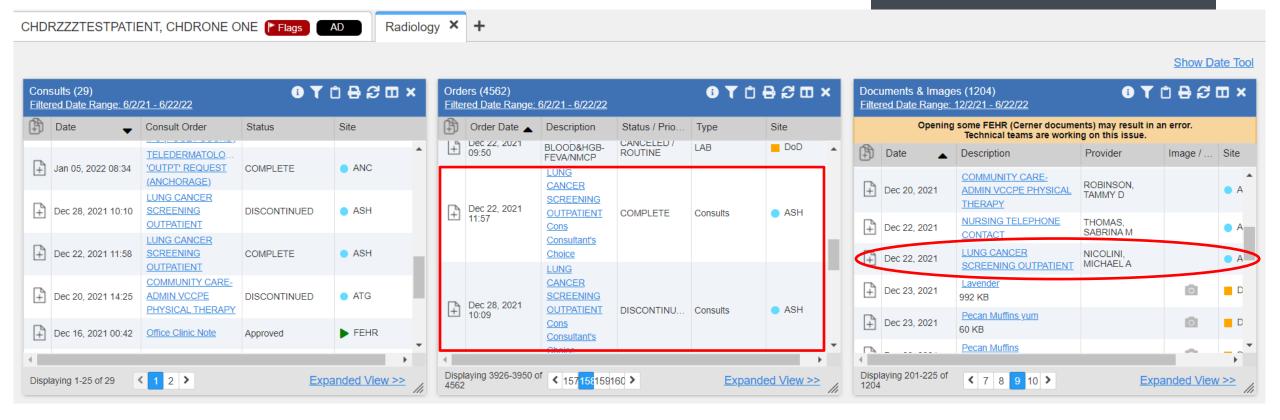

Using multiple widgets- Example

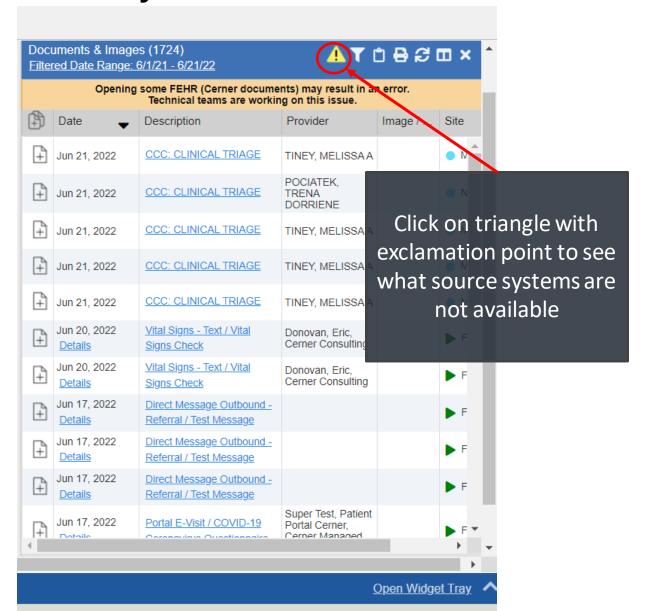

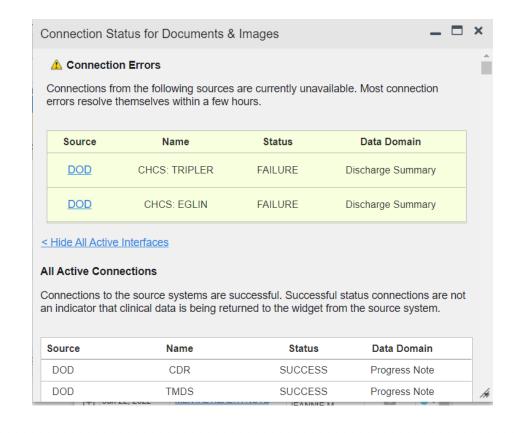

Using the "Consults" or "Orders" widget can give you a timeline to search within other widgets

Source system connection error

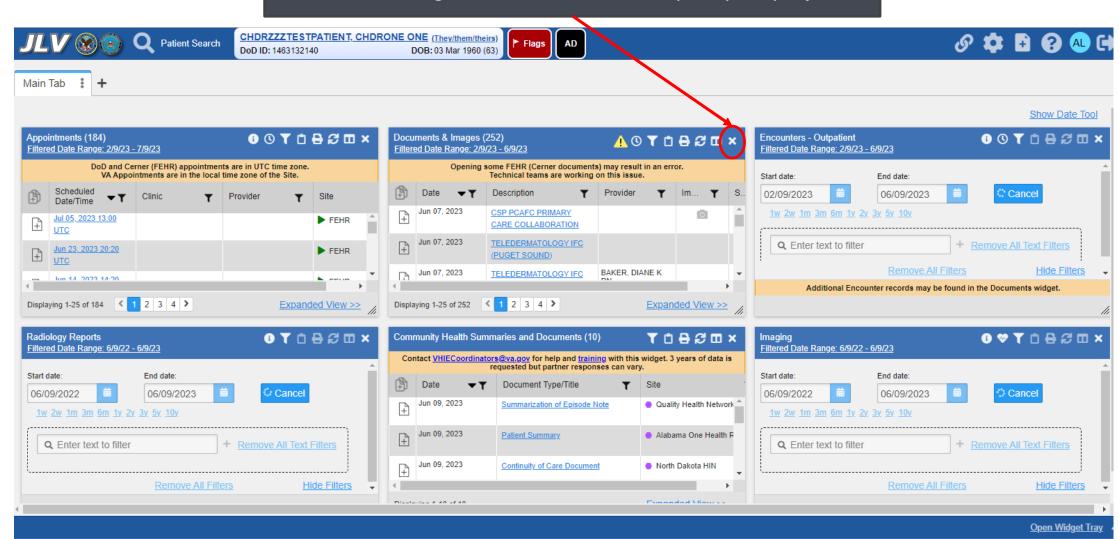

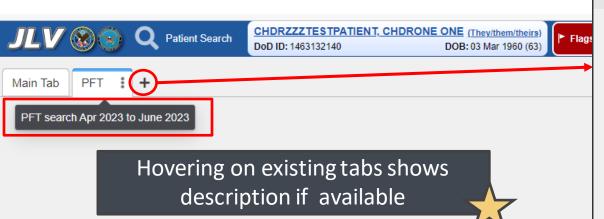

Optimizing JLV

Close out widgets that aren't necessary for your project

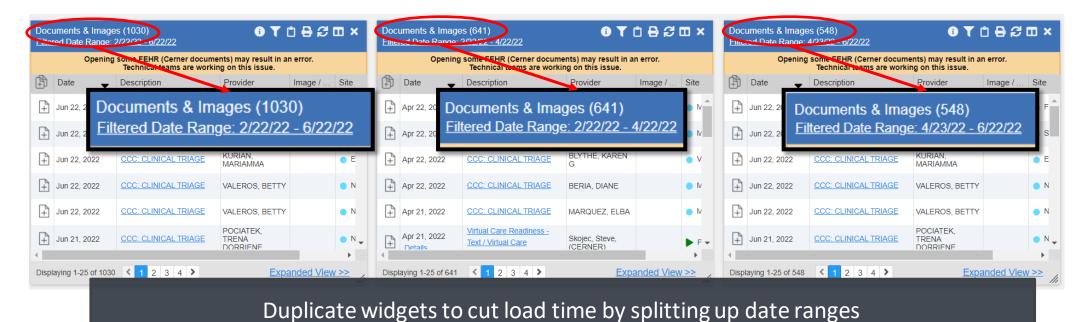

Setting up multiple tabs or duplicate widgets

Make multiple tabs for specific purposes

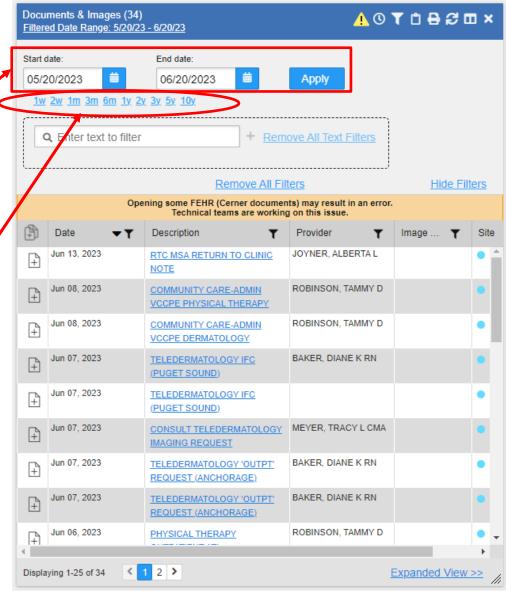

Setting date ranges

Set date manually

or

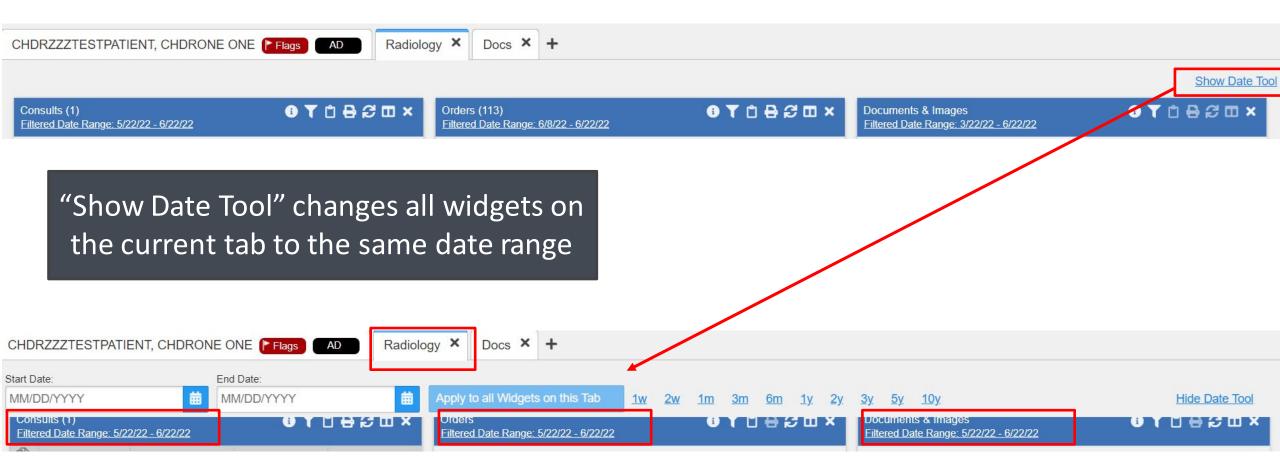

by choosing a preset range

Keeping date ranges small will allow for faster filtering and loading times

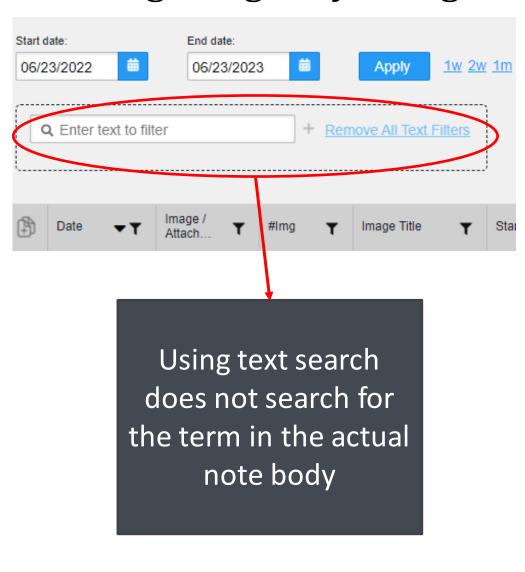

Setting date ranges-Multiple widgets

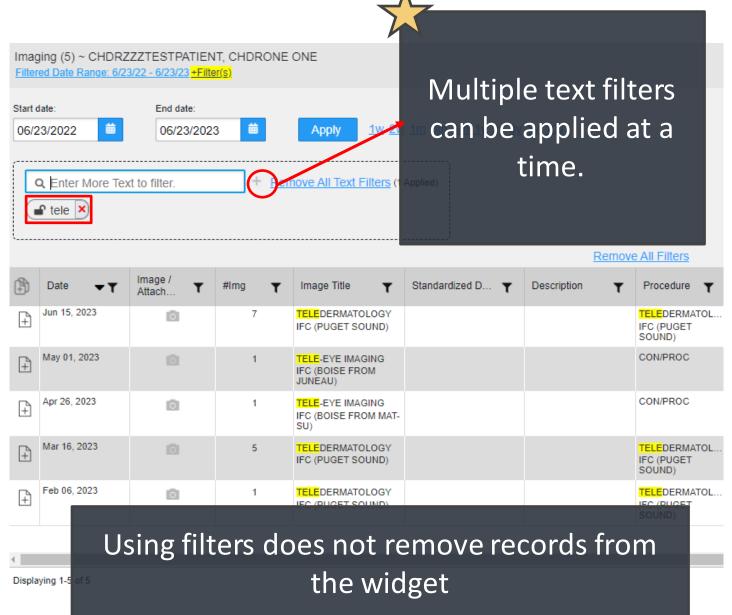

Filtering widget by using text

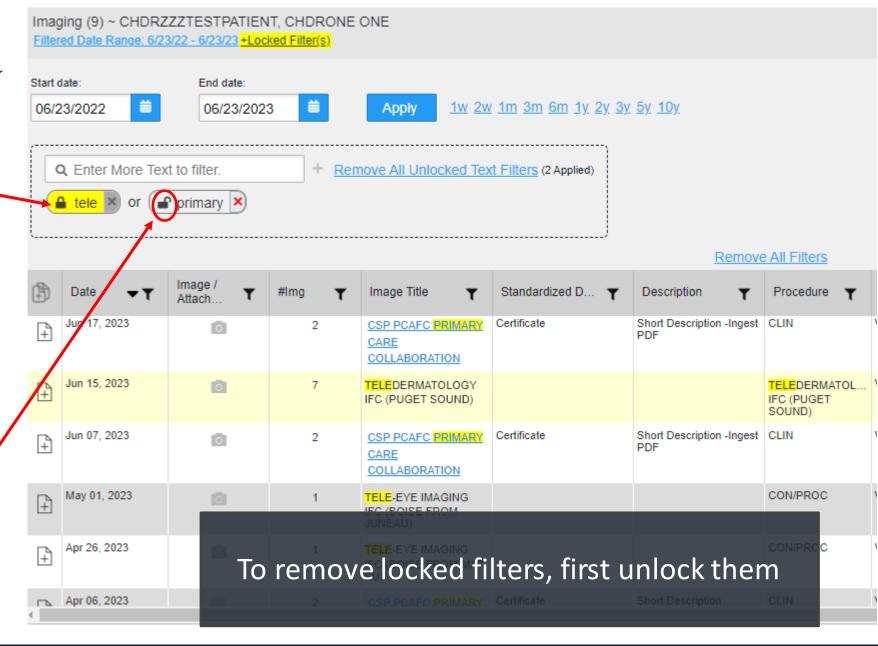

Locked filters

Locked filters remain with set date ranges even when patient is changed

Lock/unlock a filter by clicking on the lock icon

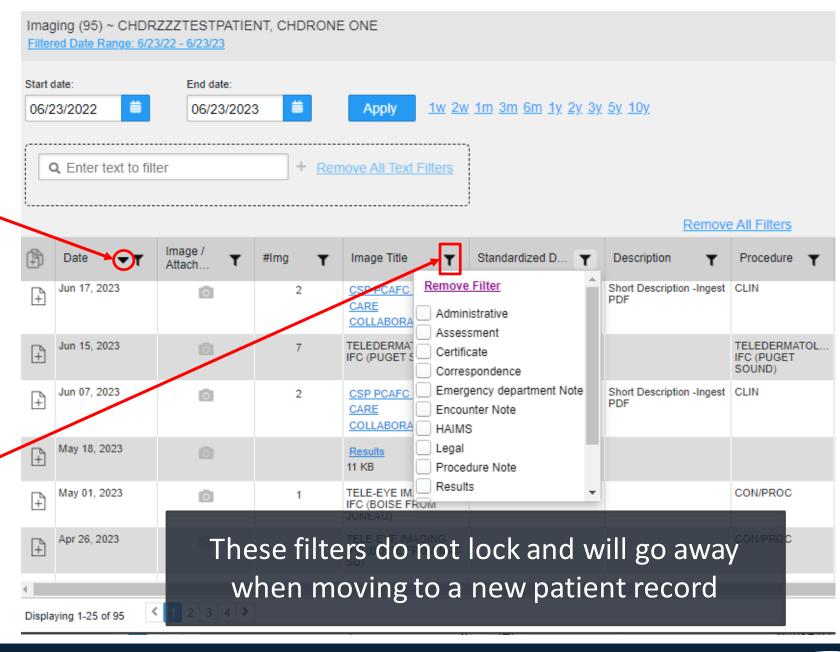

Filtering columns

Clicking the arrow organizes in descending or ascending order

Filter button on columns

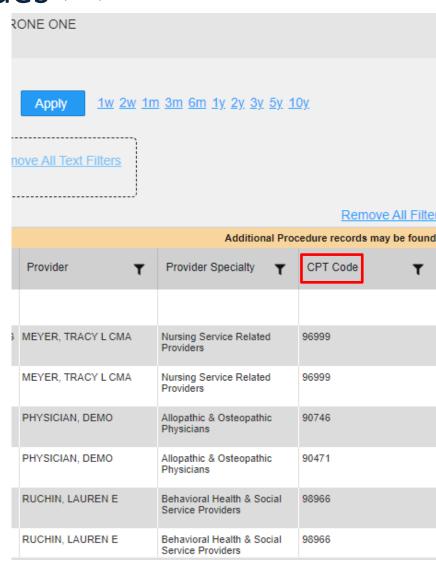

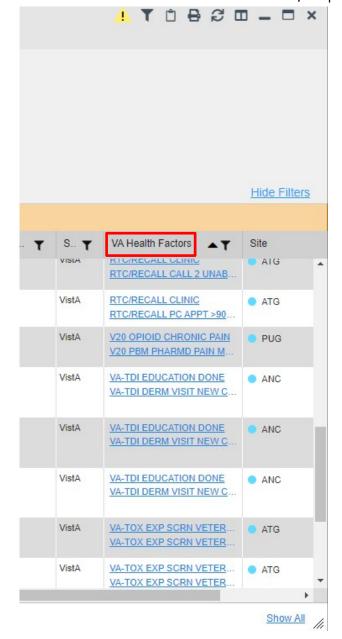

Health factors and CPT codes

CPT codes can be found in the "Procedures" widget

Health factors can be found in the following widgets:

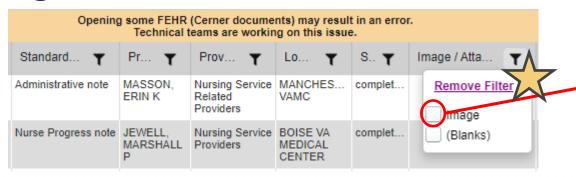

- Admissions
- Appointments
- Encounters-Outpatient
- Documents & Images

Images

Images open in VistA imaging or HAIMS for DoD

An "image" can be:

- -Picture
- -Radiology reports
- -Test result in PDF
- -Community care results
