

SGIM-VA Partnered Research Training Program: Partnered Project Activities

David Haggstrom, MD, MAS

Jeff Whittle, MD, MPH

SGIM/VA Partnered Research Program

Goals

1. Enable learners to make progress towards a specific partnered research project
2. Facilitate shared learning among participants
3. Structure mentor- participant interactions

Partnered Project Logistics

- Assignments made during each session
 - Associated deliverable (e.g., research brief)
- 1. Share deliverables with mentor
 - prior to small group (POD) meeting
 - negotiate/tailor timing with mentor
- 2. Share with peers in Pod
- 3. Share with program faculty (bakere@sgim.org)
 - day of meeting

Partnered Project Activities (PPA)

1. **Generate a project brief**
2. Identify potential partner(s)
3. Begin a relationship with a partner
4. Analyze your project with partner's lens
5. Operationalize your project
6. Sell your project to others

This month's Project Activity

1. Generate a project brief
- 2. Identify potential partner(s)**
3. Begin a relationship with a partner
4. Analyze your project with partner's lens
5. Operationalize your project
6. Sell your project to others

Identify Potential Partners

- At what level in VHA are you working – National, VISN, VAMC
- Who is the person with whom to start?
 - Person most directly responsible for the issue?
 - Person with authority to mobilize resources?
 - Person actually working in area of interest?
- Identify why you need the partner to be involved
- What is in it for the partner?

Today: Partnered Project Brief

1. Each member should take 5 minutes to present their research brief to the POD
 - a. Direct peers to areas where you need input
 - b. These presentations should be timed
2. As a group
 - a. Identify common issues
 - b. Share any pearls or questions back to Erika Baker
